Running Title: Image Similarity and Predictive AI Model in Thyroid Nodules

Keywords: Thyroid nodule, AI, TI-RADS, Minimally Invasive, Thyroid cancer, Thyroid malignancy, Image similarity, Predictive AI

Funding

The study had no funding source

Acknowledgment

We would like to acknowledge Stanford AIMI Center for their publicly shared data. Would also like to acknowledge Princeton Medical Group Endocrine Dept for their data contribution.

Disclosures

Johnson Thomas owns intellectual property rights for the AI software used in this study. This is the only possible conflict of interest that could be identified.
